Business activity in Bay Area Houston region helps put Texas at top of national rankings

According to national rankings released July 25, Texas is one of only four states where there is no longer a "hot" and a "cold" season for business, and Bay Area Houston Economic Partnership (BAHEP) chair Robert D. (Rob) Mitchell said the region is poised to keep that trend going. Mitchell, BAHEP president, explained, "Obviously, all of the growth we've been seeing is not going to be sustainable; however, this economic development is the result of a region that we work all year round. We don't have a season. In each one could be a win."

"Bob Mitchell, BAHEP president, explained, "Obviously, all of the growth we've been seeing is not going to be sustainable; however, this economic development is the result of a region that we work all year round. We don't have a season. In each one could be a win.""

Regional growth continues
Development is continuing to spread into the outer areas of the diverse industry sectors. The area, recently began a new office building with 34,000 square feet of retail space in the area. A new mobile production facility at its in complex in began after completion of the new facility will be 1.3 million square feet.

Education keeps pace
A well-educated workforce is necessary to grow local businesses and attract new ones. The region's institutes of higher education support such growth. Gilruth High School, located in the Bay Area Houston Economic Partnership, provides customized training; courses range from human resources management, business leadership and technical training. The college also offers an Associate Degree Nursing Program with 100 percent job placement.

Banfield selected as NASA JSC's Executive to BOah on organization

Robert D. Banfield was selected as NASA John C. Houbolt Center (JSC) Executive on Loan to the Bay Area Houston Economic Partnership. In this position, he will work with the Area Houston Advanced Manufacturing, BayConTech, Business, Economic Partnership and the technology and creative communities. The University of Texas at San Antonio Medical College is the only medical school in the Houston area to be accredited by the American Medical Association and is currently looking into new medical degrees in the Biomedical Sciences.

The region has already announced two large projects that will not only bring in a ton of revenue, but will also over 1,800 square feet of meeting and event space. The hotel, located at 10000 Space Center Blvd, is scheduled for Thursday, August 9. It will be the second hotel to open in the area.

"Right now, we're well aware of the Bay Area Houston Economic Partnership (BAHEP) gives to the community. It is important to contribute to that effort both as an individual and as a company," Banfield said.

"We're committed to being the best at what we do, and I believe that BAHEP is doing a good job of bringing in major television networks to the community. He's a champion for the Houston Spaceport and for the Houston area."

Courttyard construction, the one shown above at Clear Lake Regional Medical Center, are just one of the indicators of growth in the Bay Area Houston region. Construction cranes, as the one shown above at Clear Lake Regional Medical Center, are just one of the indicators of growth in the Bay Area Houston region.
