Region gains innovative solutions with newest BAHEP member

BAY AREA HOUSTON, TX – Commercial and government small businesses looking for proven results don't have to look any further than Bay Area Houston Economic Partnership's newest member.

"We are thrilled to have IN Consulting as a member of BAHEP," said Bob Mitchell, president. "I look forward to working with them through our organization to foster further growth in the region."

IN Consulting LLC (IN) specializes in management, technology and engineering support for small businesses in the region. IN Consulting is able to build multi-disciplinary teams from its network of technology savvy staff, consultants and industry experts.

This network, backed by experienced management, gives the company capabilities in aerospace, energy, federal contracting, litigation, medical, and technology. IN Consulting has a number of delivery assets ranging from data discovery tools, training centers, offshore resources to data centers.

Building on the initial success of a Federal Aviation Administration (FAA) contract win, IN was involved in proposal roles for major wins in the U.S. Air Force – Space and Missile Systems Center, National Oceanic and Atmospheric Administration, FAA – Joint Planning and Development Administration, U.S. Army and both NASA-Johnson Space Center and Kennedy Space Center.

"At the same time, our company had explosive growth in our commercial and small business consulting work," said Kent Kaase, managing director of IN Consulting. "Going forward, our primary business goal in 2008 is to expand our government work while continuing our substantial commercial growth."

IN Consulting is very active in the community and recently sponsored the Ellington Field 90th Anniversary celebration among several other community activities.

"Joining BAHEP gives us an opportunity to expand our business goals; most importantly though, it gives our business the opportunity to become a more active participant in the leadership of Bay Area Houston," Kaase said.

IN Consulting is based upon a long history of successful projects ranging back 1985 and was founded in 2005 as a joint venture from three different businesses.
