Services

Moody Health Center is the public outpatient integrative-medicine teaching health center at Texas Chiropractic College and offers world class chiropractic care from the doctors who are leaders in the field of chiropractic and medicine. Services offered include:

- Chiropractic
- Primary Care Medicine and Pediatrics
- Neuromusculoskeletal Injuries and Conditions
- Spinal Condition Experts
- Sports Injury Care
- Acupuncture
- Nutritional Therapies
- X-Ray and Lab Services
- Outpatient Physical Rehabilitation Facility
- Fees are considerably lower because of substantial financial support from Texas Chiropractic College.

Physicians and Other Staff

Moody Health Center includes eight doctors of chiropractic and 10 support personnel. This facility usually includes 70 -125 chiropractic interns who are completing their final year of their chiropractic clinical requirements.

Community Outreach Programs

Moody Health Center participates in numerous health fairs, screening programs, health education presentations, school talks and lectures, school sports physicals and athletic events within the local communities throughout the year.

Free chiropractic care is offered to residents of Pasadena's "Bridge over Troubled Waters" battered women's shelter.

New programs and Initiatives

Our Spinal Decompression Facility Unit allows many patients a conservative option to spine surgery with shorter recovery times and minimizing risks associated with conventional surgery.

The Myogauge company has chosen Moody Health Center to cooperate in research defining pre and post injury performance parameters. The Myogauge System allows us to provide local industries with objective pre-employment physicals that measure baseline physical capabilities that can be used to quantify any future injury and recovery. The system provides objective measures that are reproducible and accurate.

Patients

Moody Health Center had 19,943 patient visits in 2007.

Mission

Our mission is to serve the health care needs of the community while preparing portal of entry health care practitioners who function effectively as members in the health care system.
