## **BAHEP welcomes infraTECH Engineers & Innovators, LLC**

**BAY AREA HOUSTON, TEXAS** – Houston-based consulting firm infraTECH Engineers and Innovators, LLC provides cost effective and innovative solutions to infrastructure projects. The company's expertise covers all aspects of transportation, storm water management plans, complex hydraulic structures, bridges, roadways, public works, and site development engineering. The firm has recently become a member of the Bay Area Houston Economic Partnership.

“We’ve been particularly impressed with BAHEP’s storm surge protection efforts and would like to partner with BAHEP and others in moving such projects forward. As the EOR (Engineer of Record) on many major New Orleans Flood Control projects after Hurricane Katrina, I had met the BAHEP leadership team with the Texas delegation during their NOLA trip and briefed them while they were visiting those projects. I have seen their commitment and interest to do something great for the Texas region. Our experience in Louisiana, New York, and Europe would relate well to such protection projects,” stated Anwar Zahid, Ph.D., P.E., president and CEO of infraTECH Engineers & Innovators, LLC.

BAHEP President Bob Mitchell commented, “For the last few years, I have seen engineers of infraTECH working with the Gulf Coast Community Protection and Recovery District (GCCPRD) as its gate and structural design lead regarding storm surge suppression. The firm’s multi-disciplinary engineering experience provides a strong basis for its comprehensive services.”

With experience in federal, state, and local agencies, as well as private entities, infraTECH engineers have extensive experience working on a wide variety of projects. They have worked on many projects with U.S. Army Corps of Engineers, Texas Department of Transportation, Harris County Flood Control District, Harris County Toll Road Authority, Harris County Engineering Department, Port Houston, and other local agencies including the cities of Houston, Stafford, Dallas and Fort Worth.

Located at 11111 Wilcrest Green Drive, Suite 410 in Houston, TX 77042, infraTECH can be reached by calling 281.732.6601 or emailing [Anwar.Zahid@infratech-us.com](mailto:Anwar.Zahid@infratech-us.com).
