

# Sustaining Bi-partisan Political Support for U.S. Space Leadership

## An Affordable, Capabilities-Driven Program of Human Space Exploration

International Space Station: A national scientific lab providing breakthrough research opportunities.

Space Launch System: A heavy-lift rocket to propel America's space explorers throughout the solar system.

Orion Multi-Purpose Crew Vehicle: A spacecraft for deep-space, human missions beyond low-Earth orbit.

Commercial Space Transportation: New systems for cargo and crew support of International Space Station.

Leadership, Jobs, Security, STEM, Quality of Life
