RE Resolution No. 2014 – 03

Rear Admiral Robert Smith III

Enclosed please find one certified copy of Resolution No. 2014 – 03 supporting the “Ike Dike Project” for a coastal barrier to protect the Houston Galveston region, including Galveston Bay, from Hurricane storm surges.

Please include Galveston County Consolidated Drainage District in your mailing list and meeting schedules.

Should you have any questions or if I may be of further assistance please contact our office at (281) 482 – 0404.

Sincerely,

A handwritten signature in black ink that reads "Joseph Anderson".

RESOLUTION NO. 2014- 03

A RESOLUTION SUPPORTING THE "IKE DIKE PROJECT" FOR A COASTAL BARRIER TO PROTECT THE HOUSTON-GALVESTON REGION, INCLUDING GALVESTON BAY, FROM HURRICANE STORM SURGES; DIRECTING THE OPERATIONS MANAGER TO SEND A CERTIFIED COPY OF THIS RESOLUTION TO REAR ADMIRAL ROBERT SMITH III, USN, PRESIDENT AND CHIEF EXECUTIVE OFFICER OF TEXAS A & M UNIVERSITY AT GALVESTON; PROVIDING THAT THIS RESOLUTION SHALL BECOME EFFECTIVE FROM AND AFTER ITS PASSAGE AND ADOPTION.

WHEREAS, the Galveston County Consolidated Drainage District (GCCDD) is located near the Gulf of Mexico and Galveston Bay and is susceptible to wind and storm surge damage resulting from hurricanes and severe storms;

WHEREAS, on September 13, 2008, Hurricane Ike caused devastation and destruction across the Houston-Galveston region with massive flooding from storm surge waters, Galveston Island and the Bolivar Peninsula being the hardest hit areas;

WHEREAS, the Houston-Galveston region is home to a concentration of petrochemical plants along the Houston Ship Channel and the Port of Houston, one of the nation's busiest ports;

WHEREAS, Professor Bill Merrell of Texas A&M University at Galveston has conceived the "Ike Dike Project" which is a proposal to create a "coastal spine" with a combination of barriers and gates extending along Galveston Island and the Bolivar Peninsula;

WHEREAS, flood gates at Bolivar Roads, the entrance to the Houston, Texas City, and Galveston ship channels, and at the San Luis Pass would provide the necessary barriers to protect these vulnerable areas against Gulf surges into Galveston Bay;

WHEREAS, the "Ike Dike Project" looks to existing technologies created in the Netherlands and duplicated with the building of the Greater New Orleans Barrier that protects New Orleans from storm surge;

WHEREAS, providing a comprehensive system of barriers and gates along the Gulf coast would protect the economy, the environment, and, more importantly, the people in the region;

WHEREAS, in 2010, the Texas Governor's Commission on Recovery and Renewal reviewed the Ike Dike Project and recommended that a six county public corporation be established to explore viable options for storm surge protection of the Houston-Galveston region;

WHEREAS, the Board of Directors of the Galveston County Consolidated Drainage District desires to support the "Ike Dike Project" in order to advance the need for a coastal barrier to protect the Houston-Galveston region from hurricane storm surges.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF DIRECTORS OF THE GALVESTON COUNTY CONSOLIDATED DRAINAGE DISTRICT, TEXAS:

Section 1: The findings and recitations set out in the preamble by the Board of Directors and made part hereof for all purposes.

Section 2: The Board of Directors of the Galveston County Consolidated Drainage District, Texas, hereby wholeheartedly supports and endorses efforts by Professor Bill Merrell of Texas A & M University at Galveston to create the "Ike Dike Project" for a coastal barrier to be completed for protection of the Houston-Galveston region from hurricane storm surges including Galveston Bay.

Section 3: The Board of Directors of the Galveston County Consolidated Drainage District, Texas, hereby encourages efforts to create a coastal barrier to protect Galveston Island and surrounding communities from hurricane storm surges.

Section 4: The Board of Directors of the Galveston County Consolidated Drainage District, Texas, hereby directs the Operations Manager to send a certified copy of this Resolution to Rear Admiral Robert Smith III, USN, President and Chief Executive Officer of Texas A & M University at Galveston.

Section 5: This Resolution shall be and become effective from and after its adoption.

PASSED AND APPROVED the 22 day of July 2014.

Harold Whitaker
Board President

Don Barcak
Board Vice President

Gary Harris
Board Treasurer
